

2017 National 4-H Beekeeping Essay Contest

**The Foundation
for the Preservation
of Honey Bees, Inc.**

Sponsored by: The Foundation for the Preservation of Honey Bees, Inc.

2017 Essay Topic: “How can MP3 (Managed Pollinator Protection Plan) more effectively protect honey bees from pesticide exposure?”

Beekeeping has had its five minutes of fame for the past seven years. Now more than ever, the general public along with beekeepers are asking “What will happen if the bees are gone?” With the continued threat of pesticides, this is a very real question. Your paper should research and help answer this question.

Survey your community to see what is being done. Include your state in your survey to see if there are any programs they are using for pollination or any other program that could aid the honey bee.

The scope of the research is an essential judging criterion, accounting for 40% of your score. The number of sources consulted, the authority of the sources, and the variety of the sources are all evaluated.

Personal interviews with beekeepers and others familiar with the subject are valued sources of information and should be documented. Sources, which are not cited in the endnotes, should be listed in a “Resources” or “Bibliography” list.

Note that “honey bee” is properly spelled as two words, even though many otherwise authoritative references spell it as one word.
