

JUNIOR DUCK STAMP PROGRAM

What is the Junior Duck Stamp Program?

“The Federal Junior Duck Stamp Conservation and Design Program is a dynamic art- and science-based curriculum that teaches wetland and waterfowl conservation to students in kindergarten through high school. The program encourages students to explore their natural world, invites them to investigate biology and wildlife management principles and challenges them to express and share what they have learned with others.”
– USFWS JDSP Website

Youth participate in an artwork competition featuring a JDSP-approved waterfowl species. The winning artwork from the national art contest will serve as the design for the Junior Duck Stamp.

By incorporating different subjects, JDSP can engage multiple types of learners and promote critical thinking, problem solving, and creativity.

Cooperative Extension
